

HORIZONTAL CLAMP

PNEUMATIC ACTUATION

It is positioned on the bases of the different machines, with the possibility of 360° rotation. Ideal for different jobs on medium and small size profiles.

By making horizontal pressure, it leaves the upper face free for the design of frets, borders, drawings, etc.

A very interesting option for its operation is to place a T, and use the air from the pneumatic pistons of the machine.

Ref: **PH01N**

MEASURES:

145 X 320 X 20 mm

100 mm opening distance. Travel up to 150 mm. Pneumatic elbows for 6 mm hose. Maximum recommended height: 60 mm.
