

## PH02

VACUUM ACTUATION

It is positioned on the bases of the different machines, with the possibility of 360° rotation. Ideal for different jobs on medium and small size profiles.

By making horizontal pressure, it leaves the upper face free for the design of frets, borders, drawings, etc.

In this option, the piston acts directly by vacuum, so there is no need for any installation.

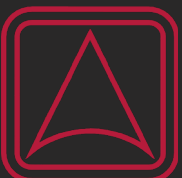

Ref: **PH02N**

### MEASURES:

145 X 320 X 30 mm

100 mm opening distance. Travel up to 150 mm.
